

autoArabic

(mPDF >= 6.0)

Description

boolean **autoArabic**

Tells mPDF whether to try and distinguish between Arabic languages when using `autoScriptToLang`.

Analysis of the text will attempt to distinguish Arabic, Farsi, Pashto, Urdu and Sindhi. If active, the text will then be marked with a specific language tag e.g. "pa", "ur", "fa" etc.

Values

autoArabic = **TRUE/FALSE**

Values

FALSE: DEFAULT Arabic script will be marked with the attribute `lang='und-Arab'` when using `autoScriptToLang`.

TRUE: mPDF will attempt to distinguish Arabic, Farsi, Pashto, Urdu and Sindhi, and text will then be marked with a specific language tag e.g. "pa", "ur", "fa" etc.
