

showWatermarkText

(mPDF >= 2.2)

Description

boolean **showWatermarkText**

Specifies whether or not to show/print the watermark text on each page. The text for the watermark must be defined using SetWatermarkText(). The watermark is added to the document at the end of each page.

Note: This superceded TopicIsUnvalidated in mPDF 2.2 as an alias, and is now the preferred form.

Values

showWatermarkText = **TRUE|FALSE**

If *showWatermarkText* is **TRUE** or 1 the watermark text will be added to each page of the document. The value can be changed during the document to turn the watermark on and off on different pages.

Values

TRUE: Show/print the watermark text

FALSE: DEFAULT Do not show/print the watermark text

Values of 1 or 0 can also be used

Changelog

Version	Description
2.2	The variable was added.

Examples

Example #1

```
<?php

$mpdf=new mPDF();
$mpdf->SetWatermarkText('DRAFT');
$mpdf->showWatermarkText = true;
$mpdf->WriteHTML('<p>Hallo World</p>');

// As showWatermark is true when the first page is finished, a watermark is added
$mpdf->AddPage();

// When the second page is finished the watermark will not appear.
$mpdf->showWatermarkText = false;
$mpdf->WriteHTML('<p>Hallo World</p>');

?>
```
