

# mPDF class fails to Initialise

mPDF still retains use of a constructor function with the same name as the class i.e.

```
class mPDF {  
    ...  
    function mPDF(...)
```

This means it is still compatible with PHP4, and is backwards compatible using PHP5 - **UNLESS** you are using namespaces in PHP >= 5.3

In this case you will need to rename:

```
function mPDF(...) {
```

as

```
__construct(...) {
```
