

backupSubsFont

mPDF >= 5.0

Optional array containing font(s) to use for missing characters when using useSubstitutions.

Default set in config_fonts.php

Default value: array('dejavusanscondensed')

Only relevant when using subsets (otherwise would add very large file), and doesn't do Indic or arabic text

More than 1 font can be specified but each will add to the processing time of the script

Names used are as defined in \$this->fontdata in config_fonts.php

Examples:

```
$this->backupSubsFont = array('dejavusanscondensed','arialunicodems','sun-exta'); // this will recognise most scripts
```

```
$this->backupSubsFont = array('dejavusanscondensed','arialunicodems'); // good default - REQUIRES Arial Unicode MS
```
