

AddPages() - Archived

(mPDF ≥ 1.3)

AddPages — Add at least one new page - DEPRACATED

Description

```
void AddPages ( string $orientation , string $type [, string $resetpagenum [, string $pagenumstyle [,
string $suppress [, float $margin-left [, float $margin-right [, float $margin-top [, float $margin-bottom [,
float $margin-header [, float $margin-footer [, string $odd-header-name [, string $even-header-name [,
string $odd-footer-name [, string $even-footer-name [, mixed $odd-header-value [, mixed $even-header-
value [, mixed $odd-footer-value [, mixed $even-footer-value ]]]]]]]]]]]]]]]]]]]]]))
```

Note: **AddPages()** is now deprecated in favour of **AddPage()**. The function was added in mPDF 1.3 with the optional values of "NEXT-ODD" and "NEXT-EVEN" for the parameter *type*. From mPDF 2.2 these values were added to **AddPage()**, giving it the same functionality. Older scripts using **AddPages()** can be simply changed to **AddPage()**, leaving all parameters unchanged.

Note: This function was removed completely in mPDF v 6.0

Changelog

Version	Description
1.3	Function was added.
2.0	Parameters <i>margin-left</i> , <i>margin-right</i> , <i>margin-top</i> , <i>margin-bottom</i> , <i>margin-header</i> , <i>margin-footer</i> , <i>odd-header-name</i> , <i>odd-header-value</i> , <i>even-header-name</i> , <i>even-header-value</i> , <i>odd-footer-name</i> , <i>odd-footer-value</i> , <i>even-footer-name</i> , <i>even-footer-value</i> were added.
2.2	Depracated in favour of AddPage()
