

Configuration files v5.x

(mPDF >= 4.0)

Three configuration files are included in the root folder of mPDF:

File name	Details	mPDF < 4.0
<code>config.php</code>	Configure most variables which affect mPDF. These values can be set at the beginning of individual scripts, but changes here will affect all of your PDF files.	These values were defined at the start of the <code>mpdf.php</code> file.
<code>config_cp.php</code>	Sets the options used for specified languages e.g. restricted fonts when appropriate.	This was contained in the function <code>GetCodepage()</code> in the <code>htmltoolkit.php</code> file.
<code>config_fonts.php</code>	Details of fonts installed in mPDF.	Previously in <code>mpdf_config.php</code> file.
