

# Page numbers & Date

In any page header or footer, {PAGENO} or {DATE j-m-Y} can be used - which will be replaced by the page number or current date. j-m-Y can be replaced by any of the valid formats used in the php [date\(\)](#) function.

The page number is the calculated number, taking regard of any resetting of numbering during the document.

You can also use the GLOBAL replacement aliases {nb} and {nbpg} (see Replaceable Aliases).
