

# formBgColorSmall - Archived

mPDF >= 2.3, <2.4

**\*\* useActiveForms and SetUserRights() were removed in mPDF 2.4 \*\***

Sets the background colour for input, textarea, checkbox and radio form fields in an active form - WHEN the form has been resized inside a table.

The borders for PDF active form fields can only be set to absolute values - 0, 1, 2, 3. The default in mPDF is 1. If a form inside a table is shrunk/resized, the border will disappear, making the field difficult to identify. Changing the background colour for resized ('small') fields will allow them to be identified clearly.

Default is '#DDDDFF'

Accepts any CSS colour value (#RRGGBB, named colours etc.)
