

# Upgrading 4.2 to 4.3 - Archived

If you have made changes to any of your configuration files etc. please keep a safe copy first. These may include:

- `config.php`
- `config_cp.php`
- `config_fonts.php`
- `mpdf.css`

Download the Upgrade .zip file and unzip it

- Upload all of the included files to the server, maintaining the folders as they are
- You can optionally delete the `mpdfi/mpdfi.php` file as it is no longer used

## ***Backwards Compatibility***

All the changes in 4.3 are backwards compatible except the use of mPDFI (importing PDF files or templates). You will need to make minor changes to your scripts. See `SetImportUse()` for more information.
