backupSubsFont

mPDF >= 5.0
Optional array containing font(s) to use for missing characters when using useSubstitutions.
Default set in config_fonts.php
Default value: array('dejavusanscondensed')

Only relevant when using subsets (otherwise would add very large file), and doesn't do Indic or arabic text

More than 1 font can be specified but each will add to the processing time of the script

Names used are as defined in $this->fontdata in config_fonts.php
Examples:
$this->backupSubsFont = array('dejavusanscondensed','arialunicodems','sun-exta');   // this will recognise most scripts
$this->backupSubsFont = array('dejavusanscondensed','arialunicodems');   // good default - REQUIRES Arial Unicode MS
