useOnlyCoreFonts - Archived

> **Note:** DEPRACATED from mPDF >= 5.0 Now uses `$mpdf = new mPDF('c');`

Description

> boolean **useOnlyCoreFonts**

When **TRUE**, forces mPDF to use the core Adobe fonts (Helvetica, Times and Courier), thus keeping the PDF file size to a minimum. Thus a CSS stylesheet defining Verdana will be substituted by Helvetica, Georgia by Times etc.

> **Note:** Ignored if mPDF is using any *codepage* other than win-1252.

Values

useOnlyCoreFonts = **TRUE**|*FALSE*

> **Values**
> **TRUE**: Use only core Adobe system fonts (if using *codepage*="win-1252")
> *FALSE*: **DEFAULT** Use all available fonts

Examples

Example #1

```php
<?php

$mpdf=new mPDF('win-1252');
$mpdf->useOnlyCoreFonts = true;
$mpdf->WriteHTML('<p style="font-family: Verdana">Hallo World</p>');
$mpdf->Output('filename.pdf');

?>

Will output Hallo World in Helvetica font (Adobe system font)
```

Notes

> **Note**: This variable was renamed from *use_embeddedfonts_1252* in mPDF 3.0 as it more accurately describes its function.
